

ROPOX MOBILIO SHOWER BED

Simply
MOVING & SLEEPING

ROPOX™
BETTER WAYS TO BETTER DAYS
— A PART OF **AdiLife**

The Ropox Mobilio is the ultimate height adjustable, moveable shower bed, suitable for both adults and children. Designed to enable optimum working conditions for the caregiver, and a safe and comfortable showering experience for the user.

Low friction wheels allow the bed to be effortlessly moved. Once in position, the brakes can be easily applied, ensuring the bed is both stable and secure. The freestanding bed can then be accessed from either side. The manoeuvrability of the bed allows for complete versatility.

The brakes are operated by individual foot pedals. A central lock system is also available, which allows all four brakes to be activated simultaneously.

The height of the bed is easily adjusted using an electrical hand control. The bed can be raised and lowered between 59cm and 99cm. The lowest position allows the user to access the bed comfortably and safely. The caregiver can then raise the bed to a suitable height, enabling healthy working conditions. A three-metre spiral cable allows the hand control to be operated from any position around the bed.

The soft, smooth double-sided polyurethane slats enable the bed to be dual-purpose. One side of the slats curve slightly downwards in the middle, providing a safe, comfortable, and natural position for the user whilst showering. The other side of the slats are flat, making it easier for the caregiver to turn the user onto their side when using the bed for changing. The removable slats and water collection tray are smooth with rounded corners to enable easy cleaning. This ensures a high standard of hygiene is maintained.

The Ropox Mobilio is available in three different lengths and can accommodate a user weighing up to 200kg. Bed guards are included as standard. Battery pack will be required for use in wetrooms.

Additional accessories available include a back support (see top image above) and headrest - allowing for a tailored package to suit individual needs.

5 & 10 Year warranty packages are available including annual servicing.
